The TOP 6 Reasons Why Homeowners Love and Contractors Buy & Build With ...

Homeowners Love ...

- 1 The Most Popular Color Palette**
Four great colors that give you the best choice in the industry!
- 2 Barefoot Friendly**
Kids, decks and summer. Need we say more? This is the best, splinter-free, non-slop or slide play zone there is.
- 3 More Natural Looking Than Any Other Composite Deck**
OASIS™ has the best natural wood appearance – hands down! With our proprietary random embossing process on one side and a brushed finish on the other, you won't find a more natural looking composite deck anywhere.
- 4 Solid Construction**
Such a stable feel! Since OASIS™ is engineered for high plank strength, it actually reduces the typical "spongy" deck feel. Truly a sensible buy!
- 5 Eco-Friendly**
You go green when you go OASIS™. With OASIS™'s wood components from reclaimed materials, you get a deck that's as environmentally friendly as it is recreation friendly.
- 6 Backed by Alcoa**
That means you get a century worth of trust behind OASIS™. It's not just a warranty, but the company's reputation.

Contractors Buy & Build With ...

- 1 Precision in Every Single Plank**
Save time sorting through lumber. Save aggravation on the job. OASIS™ planks offer unsurpassed flatness, straightness and dimensions for easy installation every time.
- 2 Built From the Best**
Alcoa demands that nothing but the best goes into OASIS™. Tight controls on raw materials, exacting polyethylene properties and specific wood fiber size all contribute to an exceptional and consistent product.
- 3 Superior Wood Encapsulation**
Like the way the color is fully dispersed through the planks? Does it look and feel better than what you're used to? There's a reason. It's called superior wood encapsulation, and it's a precision process that fully coats the wood fibers with polymer before planks are formed. It also means added protection from mold, mildew and decay.
- 4 Work it Like Wood**
Break out the router. Miter it like mad. Cut and fasten it just like wood. You'll find it has all the workability and none of the problems of wood.
- 5 Helps Protect Against Tannin Stains**
Tannin stains can leach out and ruin a good deck over time. OASIS™ uses pine fibers which are naturally low in tannins. Imagine reducing homeowner call-backs!
- 6 It's Better Because it's Alcoa**
Year after year, the finest name in the industry is your assurance of advanced technology, superior engineering, and a proven reputation for the best product support in the nation.

Design your own deck . . .

A gorgeous, well-designed deck creates additional living space, enhances our home and landscape, and increases property value. Our professional deck designers and contractors are proud to offer the best decking products in the industry. Composite decking, OASIS™ by Alcoa combines leading-edge technology with old world craftsmanship for a deck that delivers year after year.
